

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 16.5 million by 2020, and the number of people aged 75 and over to 8.5 million (Office for National Statistics 2000). The increase in the number of people aged 65 and over is expected to be due to a combination of factors, including a decline in the birth rate, a decline in the death rate, and a decline in the rate of emigration (Office for National Statistics 2000).

The increase in the number of people aged 65 and over is expected to have a significant impact on the UK's economy and society. The increase in the number of people aged 65 and over is expected to lead to a decline in the number of people in the workforce, which will lead to a decline in the number of people who are able to pay taxes and contribute to the economy. The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to support themselves, which will lead to a decline in the number of people who are able to pay for their own care and support. The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to contribute to the economy, which will lead to a decline in the number of people who are able to pay for their own care and support.

The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to contribute to the economy, which will lead to a decline in the number of people who are able to pay for their own care and support. The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to contribute to the economy, which will lead to a decline in the number of people who are able to pay for their own care and support. The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to contribute to the economy, which will lead to a decline in the number of people who are able to pay for their own care and support.

The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to contribute to the economy, which will lead to a decline in the number of people who are able to pay for their own care and support. The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to contribute to the economy, which will lead to a decline in the number of people who are able to pay for their own care and support.
